

What is secure+?

- secure+ is your **peace of mind** from cyber threats
- We monitor your IT environment 24/7, hunting for signs of potentially **malicious behaviour** or cyber breach
- Our skilled, in-house Cybersecurity analysts respond to alerts, investigating and acting where necessary to **safeguard your organisation** from cyber criminals or malicious insiders.

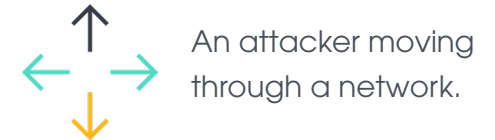

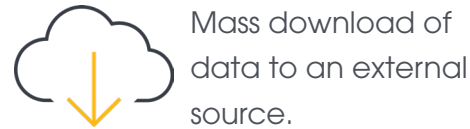

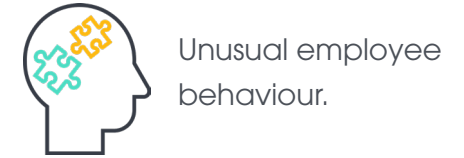

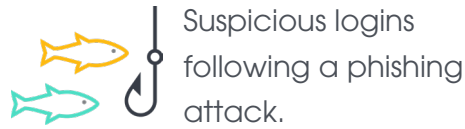

How does it work?

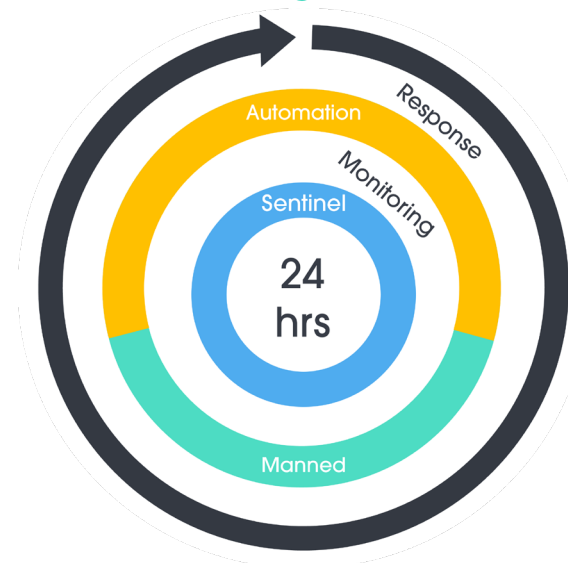

1. Data ingested from M365, EDR, server & other sources
2. Sentinel identifies malicious behaviour
3. ramsac Cyber team respond & resolve.

What can secure+ detect?

secure+ can detect hundreds of indicators of compromise including:

24/7 monitoring & response

- **Monitoring** runs 24/7 across your estate
- **Response** is manned during business hours, and intelligent automated responses overnight and at weekends, including device isolation and account lockouts.
